

Comparison on systems characteristics

We've been developing our system with no blind imitation of the others'.

All what you see now in the Service resulted from the long-term and labourous development, in the part of ideology - mostly. All facilities, tools, interconnections, organization of work are tightly intertwined one with another and destined to make management and realization of projects of any complexity easy and convenient. We made our interface easy and simple. We took into consideration what's still required and built in the tools necessary for quick and effective processing of large flows of information. Communications are simple and easy-to-access.

We tried to organize the work in the system in the way the managers think and work. And now, in result, we don't need to think about how to manage - 'cause the system itself works in the logic of the manager.

After the service was ready, we've compared it with existing products. And it's up to you now - to draw a conclusion.

Tools and facilities	BaseCamp www.basecampHQ.com	activeCollab www.activecollab.com	KommandCore www.kommandcore.com
Easy-to-use intuitive interface	0	0	1
Work in the way of "one window" (with no endless jumps from page to page)	0	0	1
Smart folders automatical router of informational objects when they appear in the system	0	0	1
Instant direct connection with us within the service	0	0	1
Kommand line (the tool of creation of all objects in the system)	0	0	1
Assigning Tasks, To-Do lists	1	1	1
m-Tasks (micro-Tasks)	0	0	1
Inner e-mail	1	1	1
Outer e-mail	0	0	1
Collective discussions available Blog, forum, wiki	0	1	0
Creation via e-mail available (comments, tasks, messages...)	0	1	0
Any objects attached to messages (tasks, milestones, contacts, files, notes)	0	0	1
Sources defined (assembling of cause-effect relations automatically and manually)	0	0	1
Files (storing)	1	1	1
Files versioning	0	1	0
Images previewing within the system (jpg, png...)	0	1	1
Previewing of any files directly in the system (doc, xls, ppt, pdf...)	0	0	1
Search	1	1	1
Advanced search (instantly given search results as a required phrase is being entered)	0	0	1
Time tracking	1	1	0
Chat	0	0	1
Events, milestones	1	1	1
Personal notes (Project's logbook)	0	0	1
Gantt chart	0	0	1

Documents and objects printed within the service (letters, tasks, events, notes...)	0	1	1
Objects, files sharing (publication) for the System participants	0	0	1
Marks, labels, tags	0	1	1
Language support (interface)	1 language (English)	1 language (English)	5 languages (English, French, German, Chinese, Russian)
Skins and views adjusted	1	1	0
Support build-in the system	0	0	1
Free account available	1	0	0
Demo-version available	0	1	1
Mobile (phone) version available	0	1	0
